

Professor Robert Whitbourn

MBBS BSc(Hons) BMedSci FRACP FCSANZ

Interventional Cardiologist

Professor Rob Whitbourn works at St Vincent's Private Hospital Werribee.

Professor Whitbourn offers treatment in both public and private hospitals. He established the Cardiovascular Research Centre, and holds the positions of Director of Cardiac Catheterization Laboratories at St Vincent's Hospital Melbourne and Director of Cardiology St Vincent's Private Hospital Melbourne.

Rob is consulting in rooms near to St Vincent's Private Hospital Werribee as well as St Vincent's Private Hospital East Melbourne and Fitzroy.

Rob has particular interests in:

- Ischaemic Heart Disease
- TAVI (percutaneous Aortic Valve Implantation)
- Valvular Heart Disease
- Hypertension / Renal denervation

Rob has been the Principal Investigator on multiple research studies and numerous first-in-man cardiac technologies ranging from novel coronary drug eluting and bioabsorbable stents, TAVI (percutaneous valve implants) and pioneered renal sympathetic denervation (RDN). As Principal Investigator for the Symplcity HTN1 study, Rob performed some of the first cases of RDN in the world.

Rob has a substantial publication track record, is an author of more than 150 papers, has given numerous invited lectures at national and international scientific meetings with substantial research funding success.

Professionally, Professor Whitbourn is extremely active. He is on the Interventional Working Group of the CSANZ, and sits on the Executive of ANZET (Australia & New Zealand Endovascular Therapies) Group as a founding member and is Chair of the Live Case Program for the annual ANZET meeting. He is also on the Faculty at the EuroPCR & TCT meetings internationally.
